## Project

### Jarvis - Personal Voice Assistant (Python, Speech-Recognition, pyttsx3, APIs)

- Built a voice-controlled AI assistant capable of handling tasks like opening apps, searching on Google, and giving weather updates.
- Integrated SpeechRecognition for voice commands and pyttsx3 for text-to-speech responses.
- Added API integrations (e.g., weather updates, Wikipedia search) to improve usability.
- Strengthened concepts of Python automation, APIs, and modular programming.

### Weather App (HTML, CSS, JavaScript, OpenWeatherMap API)

- Developed a responsive weather forecast app with real-time API data fetching.
- Deployed live on GitHub Pages, accessible to users.
- Gained hands-on experience with frontend development, APIs, and UI/UX design.

### Bank Management System (C)

- Created a console-based banking system with account creation, deposit, withdrawal, and balance inquiry.
- Used file handling for persistent data storage.
- Improved logical thinking and problem-solving skills through structured programming.

## Other Tech Experience

- Contributed to college tech clubs and developer communities, helping organize events, workshops, and mini hackathons.
- Competed in coding challenges and competitions, consistently pushing my problem-solving skills.
- Passionate about growing and supporting tech communities, inspiring peers to code and collaborate.
